Khusham Khatri

+1 587-222-9062 | Khatri.khusham15911@gmail.com | Calgary, AB, Canada

PROFESSIONAL SUMMARY

Python-focused software developer with full-stack experience (Python/Django, JavaScript, React.js, Node.js) and a working foundation in Linux environments from undergraduate coursework. Experienced integrating and troubleshooting SQL/NoSQL databases, writing automation and monitoring scripts, and collaborating in Agile/Scrum teams. Currently completing a Data Science and IT Project Management diploma at SAIT, with growing interest in distributed systems and open-source tooling. Legally authorized to work in Canada — no sponsorship required.

TECHNICAL SKILLS

Languages: Python, JavaScript

Frameworks & Backend: Django, Node.js, React.js, RESTful API integration

Databases: MongoDB, MySQL, SQLite, NoSQL & SQL data modeling

Systems: Linux environments , Git, GitHub

Practices: Agile/Scrum, code review, testing & debugging, performance optimization

PROFESSIONAL EXPERIENCE

Sophy e-Technologies Pvt. Ltd. — Software Development Engineer I *May 2023 – March 2024*

- Developed server-side functionality in Python/Django and Node.js, integrating SQL and NoSQL databases (MySQL, MongoDB, SQLite) to support core application features.
- Wrote, tested, and debugged code as part of daily development work; participated in code reviews to maintain quality and catch issues early.
- Identified performance bottlenecks across application and database layers and implemented targeted fixes to improve reliability.
- Collaborated with a cross-functional, distributed team to gather requirements and resolve technical issues within Agile/Scrum sprints.
- Used Git for version control, working through branching, merging, and pull requests with the wider engineering team.

PROJECTS

Automated Backup & Monitoring Script for MongoDB (Python) — Built a Python (PyMongo) script automating database backups and running health checks (connection status, slow queries, storage usage), with anomaly alerts — hands-on practice with monitoring and observability concepts.

MongoDB Replica Set & Performance Optimization — Deployed a MongoDB replica set on Atlas, explored distributed node behavior, and benchmarked query performance before/after indexing.

Weather Application — React.js weather app with RESTful API integration for real-time, location-based updates.

Personal Portfolio Website — Responsive portfolio site built with React.js and Tailwind CSS, focused on performance and accessibility.

CERTIFICATION

- NASSCOM Certified Junior Software Developer (QP No. SSC/Q0508)

EDUCATION

Southern Alberta Institute of Technology (SAIT), Calgary *May 2025 – August 2026*
Post Graduate Diploma — Data Science and IT Project Management

Jai Hind College, Mumbai, Maharashtra *May 2020 – May 2023*
Bachelor of Vocational Studies — Software Development
