KHUSHAM KHATRI

Calgary, AB | +1 (587) 222 9062 | khatri.khusham15911@gmail.com | LinkedIn | Portfolio | GitHub

PROFESSIONAL SUMMARY

Software Developer with professional experience in React.js, JavaScript, REST APIs, and database integration. Experienced in building full-stack applications using Python, Fast API, and React, integrating AI and voice technologies, optimizing MongoDB query performance, and deploying applications using Docker and cloud platforms. Familiar with Agile/Scrum practices, troubleshooting, and software development lifecycle fundamentals. Completed SAIT programs in Data Science and IT Project Management.
Legally authorized to work in Canada — no sponsorship required.

CORE SKILLS

Development: Python, JavaScript, SQL, Fast API, Django, Node.js, React.js, Vite, REST APIs, Pydantic, SQL Alchemy, Git/GitHub, full-stack application development, debugging and troubleshooting
Databases & Data: PostgreSQL, MongoDB (Atlas, replica sets, indexing, query performance optimization), SQL/NoSQL design, Power BI, data analysis
AI & Cloud: LLM integration (Grog), real-time voice agents (Live Kit Agents), speech-to-text and text-to-speech (Deep gram), prompt design, structured LLM, Docker, Render, LiveKit Cloud, Neon, Linux fundamentals, Microsoft Azure (Familiar with cloud concepts).
Collaboration & Delivery: Agile/Scrum, end-to-end ownership from build to deployment, technical documentation, translating requirements into working features, working with cross-functional teams.

PERSONAL PROJECTS

AI Voice Interview Coach | Real-Time AI Web App

- Built and deployed a real-time voice interview coach where users hold a spoken mock interview with an AI interviewer and receive a scored feedback report at the end.
- Developed the voice pipeline with LiveKit Agents, Deepgram speech-to-text and text-to-speech, and a Groq-hosted LLM, with code-controlled interview logic (question bank, follow-up limits, transcript capture).
- Built a scoring engine that converts interview transcripts into structured reports using LLM outputs validated with Pydantic, and tailored questions to each user's uploaded resume and target job description.
- Developed a FastAPI backend (token server, report and resume endpoints) and a React (Vite) frontend with live interview, report, and history screens, including progress charts backed by PostgreSQL (Neon) via SQLAlchemy.
- Containerized the backend with Docker and docker-compose and deployed across LiveKit Cloud, Render, and Vercel, resolving CORS and environment configuration issues to support desktop and mobile use.

IndexLens | MongoDB Performance Optimization

- Deployed a MongoDB Atlas replica set and built a Python (PyMongo) benchmarking tool to measure query performance before and after indexing.
- Used explain() execution stats to analyze query plans, reducing documents examined from 200,000 to 2 and server execution time from 153 ms to 2 ms.

Weather Application | React.js

- Developed a responsive weather application using React.js to display real-time, location-based weather information.
- Integrated a RESTful weather API to retrieve and display current temperature, humidity, wind speed, and weather conditions.

Personal Portfolio Website | React.js, Tailwind CSS, Vercel

- Developed a responsive personal portfolio website using React.js and Tailwind CSS to showcase technical skills, projects, and professional experience.
- Designed a clean, user-friendly interface with reusable components and responsive layouts for seamless navigation across devices.

PROFESSIONAL EXPERIENCE

Sophy e-Technologies Pvt. Ltd. | Software Development Engineer I *(May 2023 – March 2024)*

- Developed full-stack features with React.js, Python/Django, and Node.js, integrating SQL and NoSQL databases (MySQL, MongoDB, SQLite) to support core application functionality.
- Built responsive React.js user interfaces and connected them to backend REST APIs, handling data flow, form validation, and error states across the application.
- Identified and fixed performance bottlenecks across application and database layers, and wrote, tested, and debugged code with regular code reviews to maintain quality.
- Worked in Agile/Scrum sprints with a distributed, cross-functional team to gather requirements and resolve issues, using Git branching, merging, and pull requests.

EDUCATION

Southern Alberta Institute of Technology (SAIT) - Post-Graduate Certificate, Data Science & IT Project Management *(May 2025 - Aug 2026)*
Jai Hind College - Bachelor of Vocational Studies - Software Development *(May 2020 – May 2023)*

CERTIFICATION

- NASSCOM Certified Junior Software Developer (QP No. SSC/Q0508)
